EXPERIENCE

SDE Intern

ITJOBXS · Jobs & Education Platform

📅 Apr 2026 – Present

📍 Remote, Mumbai

- Diagnosed a critical bot-spam vulnerability; implemented a PHP hashmap of 100+ validated email domains and Google reCAPTCHA, cutting spam registrations by ~60%.
- Built end-to-end MERN stack apps for an external client – E-Commerce platform and Student Management System with JWT auth and role-based access control.

SDE Intern

Mernix Consulting · Freelance Project

📅 Jan 2025 – Feb 2025

📍 Remote, Thane

- Built a full-stack Newsletter Subscription App with Nodemailer automated confirmations and debounced API calls for real-time subscription status checks.
- Optimized backend with a MySQL connection pool; deployed on Firebase (frontend) and Render (backend) with environment-based credential management.

Data Science Intern

MedTourEasy

📅 Sep 2024 – Oct 2024

📍 Hybrid, Gurugram

- Built a content-based ML recommendation system using word embeddings and t-SNE dimensionality reduction on 200+ cosmetic products, improving match accuracy by 75%.
- Designed interactive dashboards mapping product similarities and safety profiles, boosting stakeholder decision-making efficiency by 30%.
- Conducted chemical composition analysis to identify eco-friendly ingredient alternatives, supporting data-driven sustainability initiatives.

EDUCATION

B.E. Computer Engineering | CGPA: 8.00

A.P. Shah Institute of Technology (APSIT)

📅 2022 – 2026

📍 Thane, Mumbai

TECHNICAL SKILLS

- Languages:** Python, JavaScript, SQL
- Frontend:** HTML, CSS, React.js, Bootstrap, Tailwind CSS
- Backend & DB:** Node.js, Express.js, MySQL, MongoDB, Supabase (PostgreSQL)
- ML / DS:** Scikit-Learn, TensorFlow, NumPy, Pandas, Matplotlib, OpenCV
- Tools:** Git, GitHub, VS Code, Google Colab, Postman, JWT, Firebase, Render

PROJECTS

SmartSpace Tech: React, Node.js, Supabase, ML, Llama 3.3

- Built a full-stack logistics platform with RLS-secured multi-role access, an interactive 3D booking grid, and Recharts analytics dashboards.
- Developed an ML recommendation engine (87.9% accuracy) and a dynamic pricing tool to filter properties and suggest competitive real-time rental rates.
- Integrated Meta Llama 3.3 70B for natural language property search and dynamically generated descriptions explaining the AI's ranking logic.

Forgery Detection System Tech: Python, OpenCV, CNN, OCR

- Developed an AI-powered document forgery detection system to verify authenticity of bank statements, Aadhaar, PAN cards, and legal agreements using SSIM, ELA, CNN, and OCR.
- Built a real-time dashboard to visualize fraud scores and highlight forged sections for easy review.

OmniDetector Ultimate Tech: Python, YOLOv8, OpenCV, Scikit-Learn, Streamlit, WebRTC

- Built a real-time computer vision web application using Streamlit and WebRTC for live video streaming, performing object detection across 80+ classes via pre-trained YOLO models.
- Developed an analytics pipeline using Scikit-Learn (K-Means, PCA) to process the YOLO detection data on-the-fly, generating live clustering and classification insights without needing a GPU.
- Integrated Plotly dashboards to visualize live metrics and enable real-time multi-model comparisons (YOLOv8n/s/m), featuring adjustable confidence thresholds and CSV data export.

Real-Time Chat App Tech: MongoDB, React.js, Node.js, Socket.IO

- Developed a real-time messaging platform with instant one-to-one and group chat using Socket.IO, with MongoDB for user authentication and search.
- Designed a responsive React.js frontend with robust state management, ensuring seamless real-time message delivery and low-latency rendering.

CERTIFICATIONS

- Google Data Analytics – Google (Sep 2024)
- Google AI-ML – EduSkills (Jul 2024)
- AWS Academy Data Engineering – AWS (Oct 2023)
- AWS Academy Cloud Foundations – AWS (Oct 2023)
- Getting Started with Deep Learning – NVIDIA
